

Analog Electronics (higher vocational education teaching Eleventh Five Year Plan) Vocational electromechanical materials series

By QIU LI FANG

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 169 Publisher: Science Pub. Date :2008-07-01 version 1. 8 book chapters. focuses on: the basic principles of semiconductor devices and use; basic amplifier circuits. working status and performance indicators; power amplifier circuit of classification. characteristics and applications; differential amplifier circuit and an integrated operational amplifier composition and performance indicators; negative feedback amplifier circuit of the classification and application examples; integrated op-amp linear and nonlinear applications; waveform generator circuit; DC power supply. This book covers the entire contents of analog electronics. with a summary of each chapter and exercises. Book to develop students ability to apply technology as the main line. reflecting the vocational characteristics; arrangements in the organization and preparation of the content on the difficult and easy. simple and easy to understand. This book is a higher vocational education Eleventh Five-Year Plan materials. as higher vocational institutions. colleges. adult colleges and undergraduate institutions of secondary vocational and technical colleges organized by the electrical. electronics. communications. computers. automation and mechanical and electrical professional Analog Electronics. Electronic Technology (analog

Reviews

This is basically the best ebook we have study right up until now. it absolutely was writtern very properly and useful. You may like how the blogger write this ebook.

-- Cecil Zemlak DVM

This written publication is wonderful. It can be writer in straightforward phrases instead of confusing. I discovered this pdf from my dad and i suggested this publication to learn.
