Springer Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 23.5x15.5x cm. Neuware - Radio astronomy is a mystery to the majority of amateur astronomers, yet it is often the subject they turn to when they want to expand their knowledge of the sky. *Getting Started in Radio Astronomy* intends to build a bridge between complete newcomers to radio astronomy and more technical books written for those who are already serious about radio astronomy, and provides help for the first steps on the road towards the study of this fascinating subject. This book contains four easy-to-build projects, based around long-term NASA and Stanford Solar Center projects. The first three projects constitute self-contained units available as kits, so there is no need to hunt round for parts. The fourth more advanced project encourages readers to do their own research and track down items. *Getting Started in Radio Astronomy* provides an overall introduction to the topic. With details of equipment that really works, a list of suppliers, lists of online help forums, and written by someone who has actually built and operated the tools described, this book contains everything the newcomer to radio astronomy needs to get going! 208 pp. Englisch.
