Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.THIS is a work that has been urgently needed for a long time. Hammarberg s work on Idiocy, and isolated monographs here and there have led up to the desire for a work in which one could find the chief histological features of the entire cortex accurately and adequately presented. Dr. Campbell has done this in his quarto of 360 pages. After discussing the methods and material, and general remarks on cell lamination and the arrangement of nerve fibers in the cerebral cortex, he takes up the several areas of the brain substance. In Chapter III. the motor area is studied as to its structure and function. The arrangements of cell and fibers are given and comparisons drawn between the structure of the pre-central area of man and ape. Special attention to the giant Betz cells is given as well. Functional studies on the changes in the cortex in amyotrophic lateral sclerosis, post-amputative changes and the effects of lesions of this area are given in this chapter as well. The post central area is then taken up in the same exhaustive manner. Histological studies are followed by physiological considerations. Chapters V. and VI. treat of the visuo- sensory and visuo-psychic areas, and the temporal lobes and auditory area. The limbic lobe, the parietal area, the intermediate pre-central area, the frontal and prefrontal areas and the island of Reil complete the main body of the work. In an addendum the author presents further histological studies on the localization of cerebral function, dealing particularly with the comparisons of the brain of man and those of the lion, the dog and the pig. The more one reads the more is the...
